

GPT-5 Prompts

#	Level	Prompt Title	Copy-and-Paste Prompt (everything inside the quotes)
1	Easy	Five-Minute Altcoin Strength Check	"Use model:gpt-5-mini. List five altcoins that beat ETH's weekly return today. Give each coin's one-sentence catalyst and a link to price data."
2	Easy	Quick TVL Surge Watchlist	"Use model:gpt-5-mini. From DeFi Llama, name three protocols whose TVL rose more than 20 % in the last two days. Add their tokens, market caps, and a guess why TVL spiked."
3	Normal	Whale Accumulation Radar	"Use model:gpt-5-thinking. Scan Nansen and Arkham for wallets tagged fund or insider that bought over 50 k USD of any token in the past 24 h. List tokens, average entry, and likely thesis."
4	Normal	Narrative vs On-Chain Divergence	"Switch to the Analyst personality. Pick two hot Twitter narratives. For each, compare social-volume growth with on-chain active addresses over seven days. Flag any mismatch."
5	Normal	Token Unlock Stress Test	"Use model:gpt-5-thinking. Find all tokens unlocking at least 5 % of supply within 30 days. Estimate daily sell pressure in USD, compare to 14-day average volume, and tag impact Low, Medium, High."
6	Hard	Momentum Basket Builder	"Use model:gpt-5-thinking. Build a basket of five mid-caps that outperformed BTC and ETH on 30-day price and 90-day Sharpe. Weight by inverse volatility. Output a table with suggested weights and rebalance rules."
7	Hard	DeFi Revenue Regression	"Use model:gpt-5-thinking. Pull the five largest DEX or lending tokens by revenue growth this quarter. Run a simple price-to-revenue regression and show which look cheapest on a one-line chart description."
8	Hard	Grant-Fuelled Development Score	"Use model:gpt-5-thinking. Rank new Layer-3 networks launched in 2025 by developer grant size per active repo. Recommend one undervalued project on each network with a two-sentence pitch."

9	Extreme	Liquidity Shock Simulator	"Use model:gpt-5-thinking. Write pseudocode for a Monte Carlo simulation that shocks DEX liquidity by -15 % to +15 % over 10,000 paths, then outputs expected slippage on a 500k USD trade for any ERC-20. Summarize what inputs the user must supply."
10	Extreme	Correlation Decay Detector	"Use model:gpt-5-thinking. Identify three altcoins whose 90-day rolling correlation to BTC fell by more than 0.4 in the past month while volume stayed flat or higher. Explain why this decoupling may persist."

#	Prompt Title	Prompt (paste everything inside the quotes)
1	Altcoin Outperformance Screener	"Use model:gpt-5-thinking. Act as a tier-1 crypto analyst. List the 10 altcoins that outperformed ETH by at least 30 % over the last 30 days on both price and 90-day Sharpe ratio. For each coin, give market cap, catalyst, and a link to primary data."
2	Hidden TVL Acceleration Hunt	"Use model:gpt-5-thinking. From DeFi Llama, find protocols whose TVL grew more than 50 % in the past 14 days while the token price lagged by 20 % or more. Explain why the mismatch exists and whether it signals a catch-up trade."
3	Smart-Money Flow Detector	"Use model:gpt-5-thinking. Scan Nansen, Arkham, and Lookonchain for wallets tagged 'fund' or 'insider' that accumulated more than 100k USD of a token in the last 72 hours. Summarize tokens, average entry, and likely thesis."
4	Narrative Heatmap Builder	"Switch to the Analyst personality. Pull the five hottest narratives on Crypto Twitter today. For each, list two leading tokens, the news spark, and a twenty-word bull vs bear case."

|----|--------------------------------|--|
| 5 | Risk-Tiered Airdrop Planner | "Use model:gpt-5-mini. Create three airdrop strategies labeled Safe, Mid, and High Risk. For each, outline chain, tasks, estimated cost, odds of reward, and potential payout." |
| 6 | Illiquid Gem Deep Dive | "Use model:gpt-5-thinking. Select one micro-cap below USD 30 million with rising on-chain volume this week. Write a concise fundamental report: team, product, tokenomics, runway, and three red flags." |
| 7 | Token Unlock Impact Calculator | "Use model:gpt-5-thinking. Identify all tokens unlocking more than 5 % of supply in the next 21 days. Estimate daily sell pressure in USD, compare to average volume, and rate impact Low, Medium, or High." |
| 8 | L3 Ecosystem Momentum Tracker | "Use model:gpt-5-thinking. List every Layer-3 launched in the last six months. Rank by active-address growth and grant size. Suggest one project to watch on each L3." |
| 9 | On-Chain Catalyst Predictor | "Switch to the Explainer personality. Review upcoming governance proposals across the top 15 DAOs. Flag those likely to boost revenue or cut supply, and explain in forty words why each could move price." |
| 10 | Funding-Rate Dislocation Alert | "Use model:gpt-5-thinking. Scan Binance, Bybit, and Hyperliquid for coins where funding is deeply negative yet open interest climbs. Give a one-sentence long or short setup with clear invalidation." |

#	Level	Title (Miles-friendly)	Full Prompt
11	Easy	BTC Dominance Dip Finder	“Use model:gpt-5-mini. List three tokens that pumped $\geq 15\%$ on the last two days when BTC dominance fell by $\geq 0.8\%$. Give the dates and the catalyst tweet.”
12	Easy	Stablecoin Flow Pulse	“Use model:gpt-5-mini. Pull Glassnode data for USDT, USDC, and FDUSD exchange inflows over seven days. Which chain shows the sharpest uptick and what might it signal?”
13	Normal	ETF Whale Front-Run	“Use model:gpt-5-thinking. Scan 13 F filings released this week. Flag any US-listed crypto ETFs that saw $\geq 10\%$ new shares added. Name the fund, ticker, and underlying weightings.”
14	Normal	Alt-Beta Dip Meter	“Switch to the Analyst personality. Pick five altcoins that drop harder than ETH on red days but bounce harder on green days. Output beta vs ETH, plus the best ‘buy-the-blood’ level.”
15	Normal	Perp Basis Arbitrage Grid	“Use model:gpt-5-thinking. Compare spot vs perpetual prices on Binance, OKX, and Hyperliquid. Highlight pairs with basis > 75 bps annualised where funding is still negative. Give a one-liner carry trade.”
16	Hard	VC Deal-Flow Heatmap	“Use model:gpt-5-thinking. Parse this quarter’s disclosed seed and Series A crypto deals. Rank chains by total capital raised and average valuation. Surface one overlooked deal per chain.”

17	Hard	Option Skew Screener	"Use model:gpt-5-thinking. Pull Deribit data. List altcoins with 25-d RR skew > +12 % while implied vols sit below six-month mean. Explain what the skew says about tail risk."
18	Hard	RWA Yield Ladder	"Use model:gpt-5-thinking. Generate a ladder of five on-chain RWA protocols ordered by real-world APY. Include asset type, lock-up, and smart-contract audit date."
19	Extreme	Flash-Loan Stress Tester	"Use model:gpt-5-thinking. Draft pseudocode to simulate a 5 m USD flash loan attack on a DEX pool. Output the parameters needed and the worst-case slippage on a 99 % shock."
20	Extreme	Treasury-Dump Early-Warning	"Use model:gpt-5-thinking. Identify DAOs where the treasury holds >20 % of circulating supply and a token unlock or governance vote enabling sales occurs within 14 days. Rate price-dump risk."
